# ESSENCZAA

LACQUERED ADVENT LAMINATE

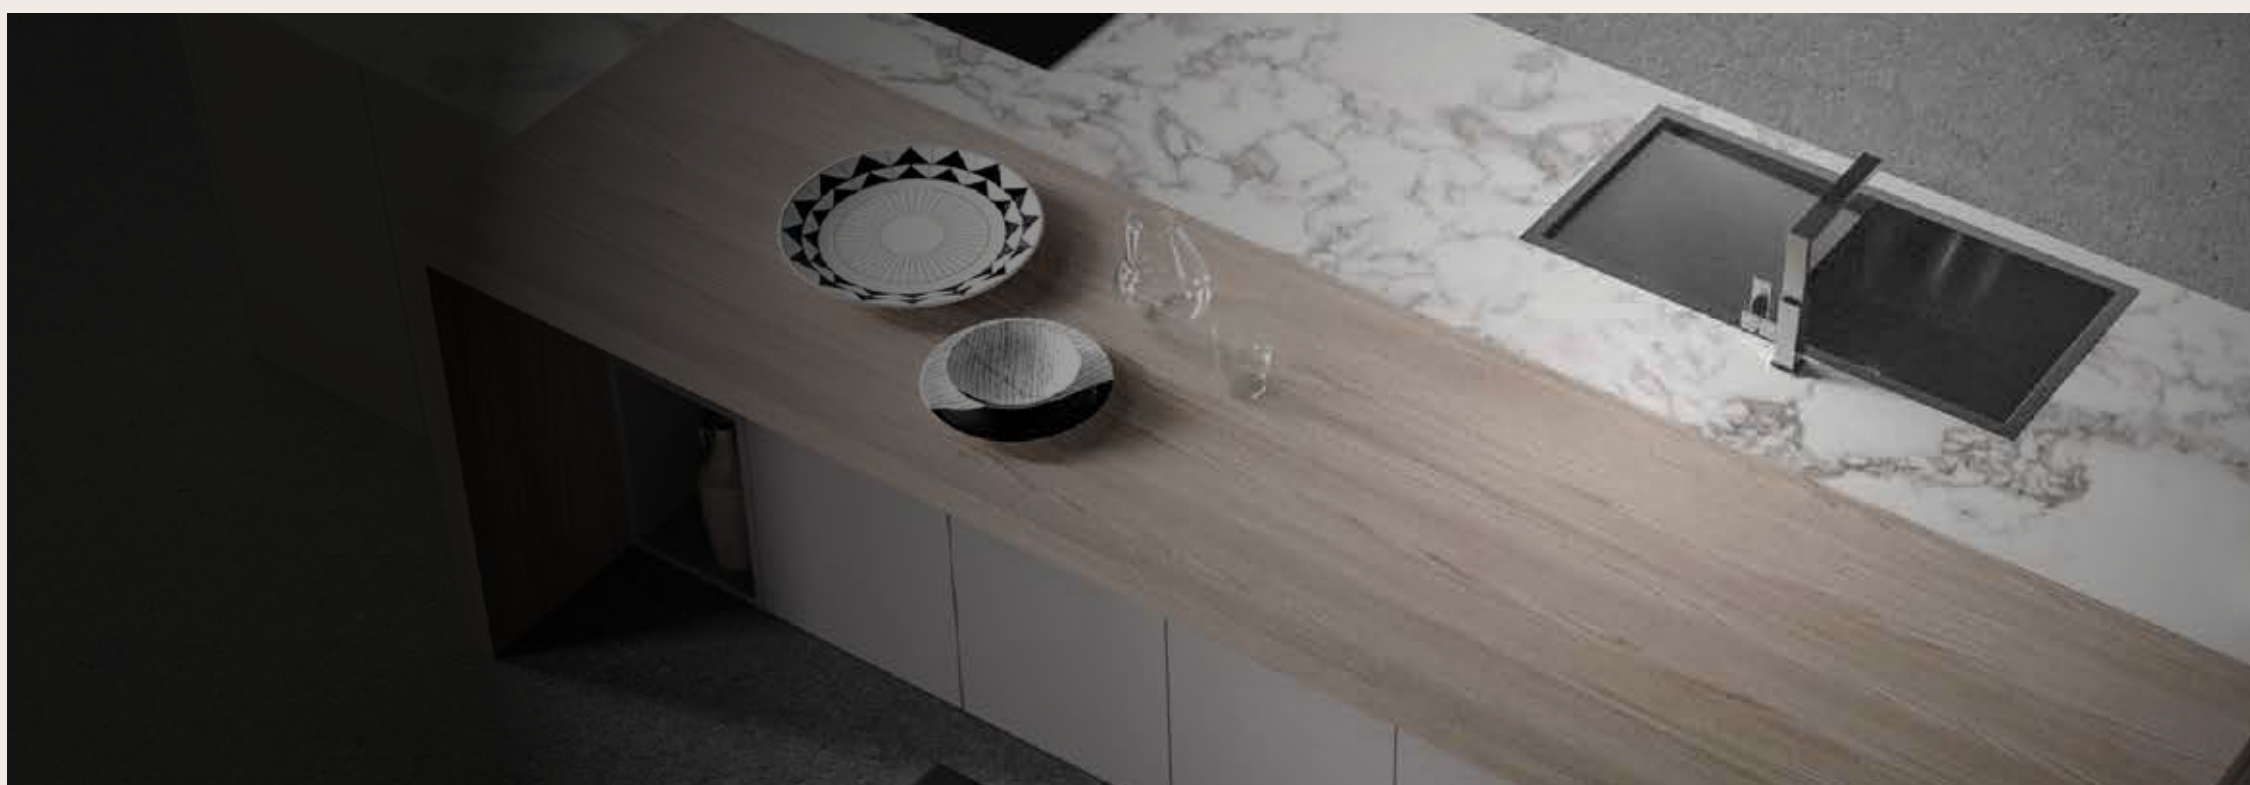

## ESSENCZAA

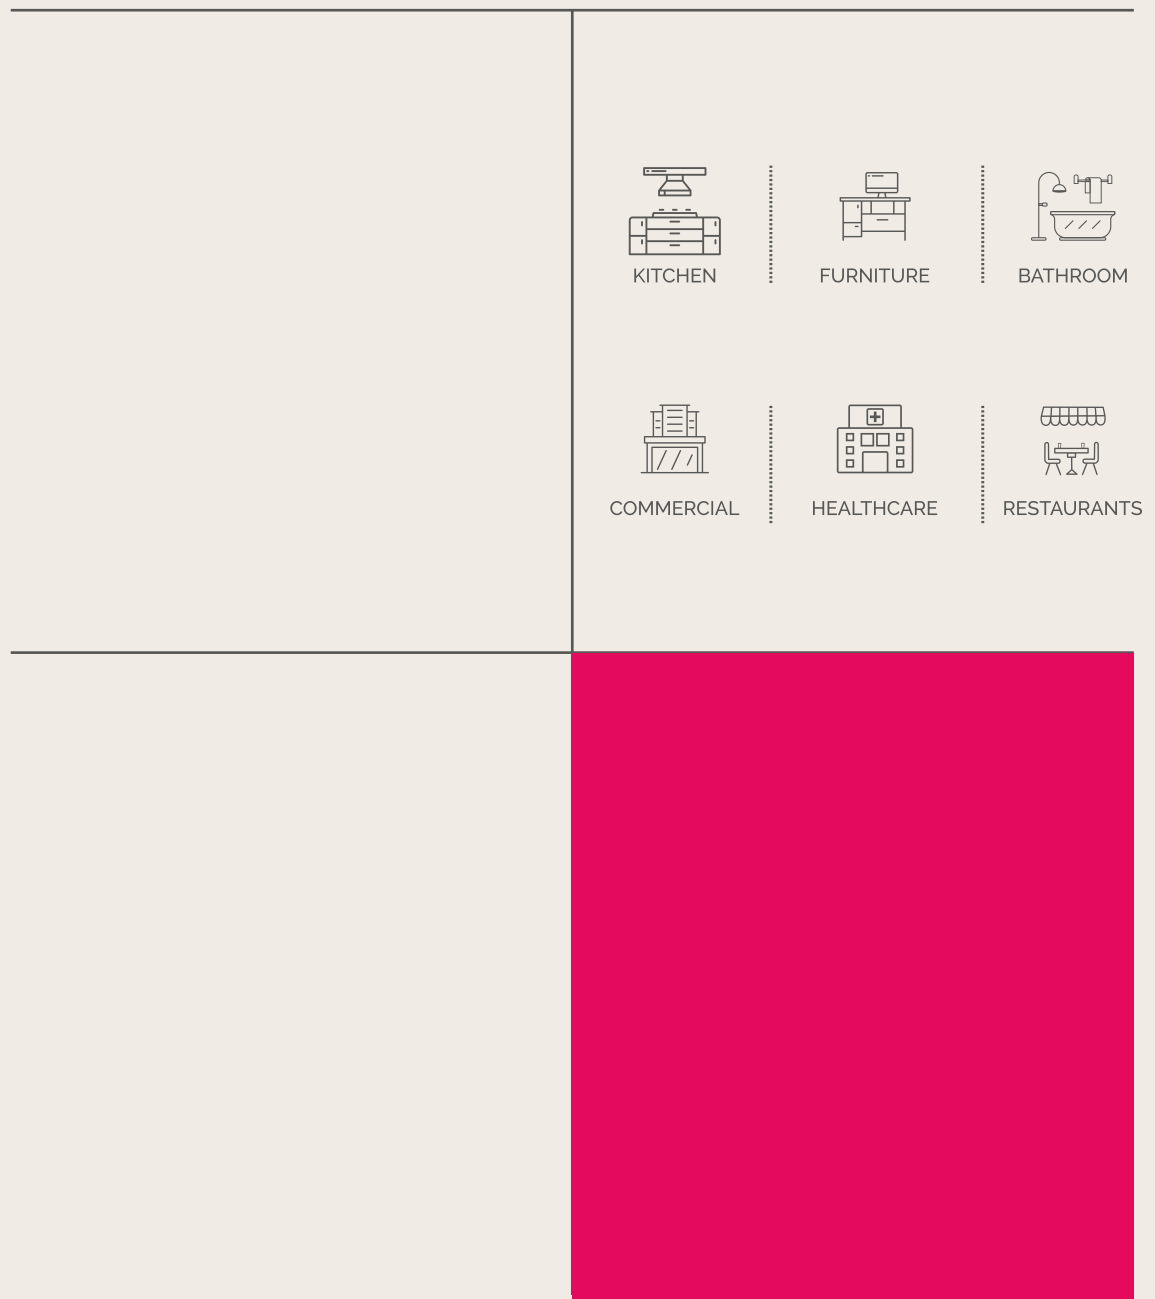

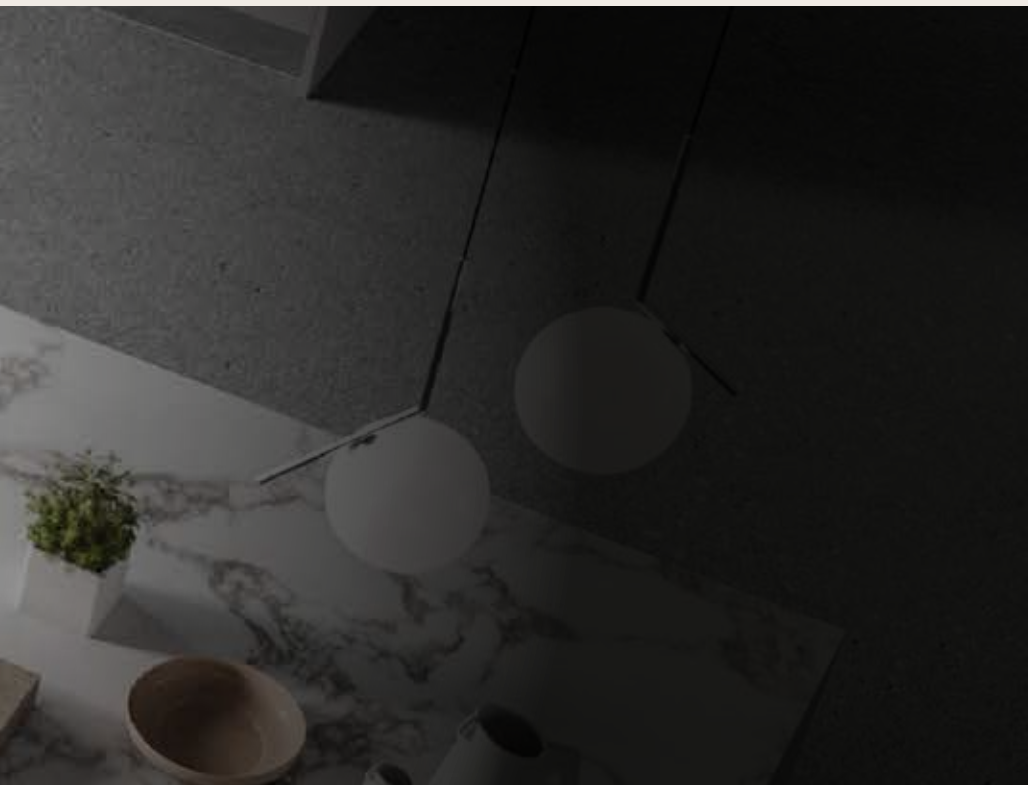

LACQUERED ADVENT LAMINATE

ESSENCZAA is the perfect material that exudes efficiency with breath taking designs. With crystal effect & highly defined contour. ESSENCZAA creates a lasting impression on your surrounding.

### True Gloss & Sensibility

Our 1.5mm acrylic sheets offer outstanding optical clarity, allowing light to pass through with exceptional brilliance. The smooth, polished surface enhances the visual appeal of your projects, creating a sleek and professional look. With their transparent nature, our acrylic sheets showcase colors vividly.

## Designed for Life

A Brand that believes strongly in getting basics right to attain inevitable success by giving prime importance to 4 essences, viz, Ethics, Principles, Trust & Commitment. Based on the strong foundation, DEXARTE, a brand evolved purely with the Passion to provide luxury yet affordable decorative sheets to the ever dynamic, growing, modern & discerning Indian consumer who always has an extra ordinary demand.

### Premium quality surfaces

Our passionate efforts through huge experience in style, technology, comfort & affordability. Dexarte® designs are nature inspired created with skilful craftsmanship offering a dazzling spectrum of stunning colours, classy textures, scintillating crystal Gloss giving enormous beauty to your environment.

### In-sync with environment

We believe in giving back to nature as it plays a crucial role in our well being. All our Inspiration derived by nature encourages us to source products from sustainable factories and take good care of nature with heavy recycling.

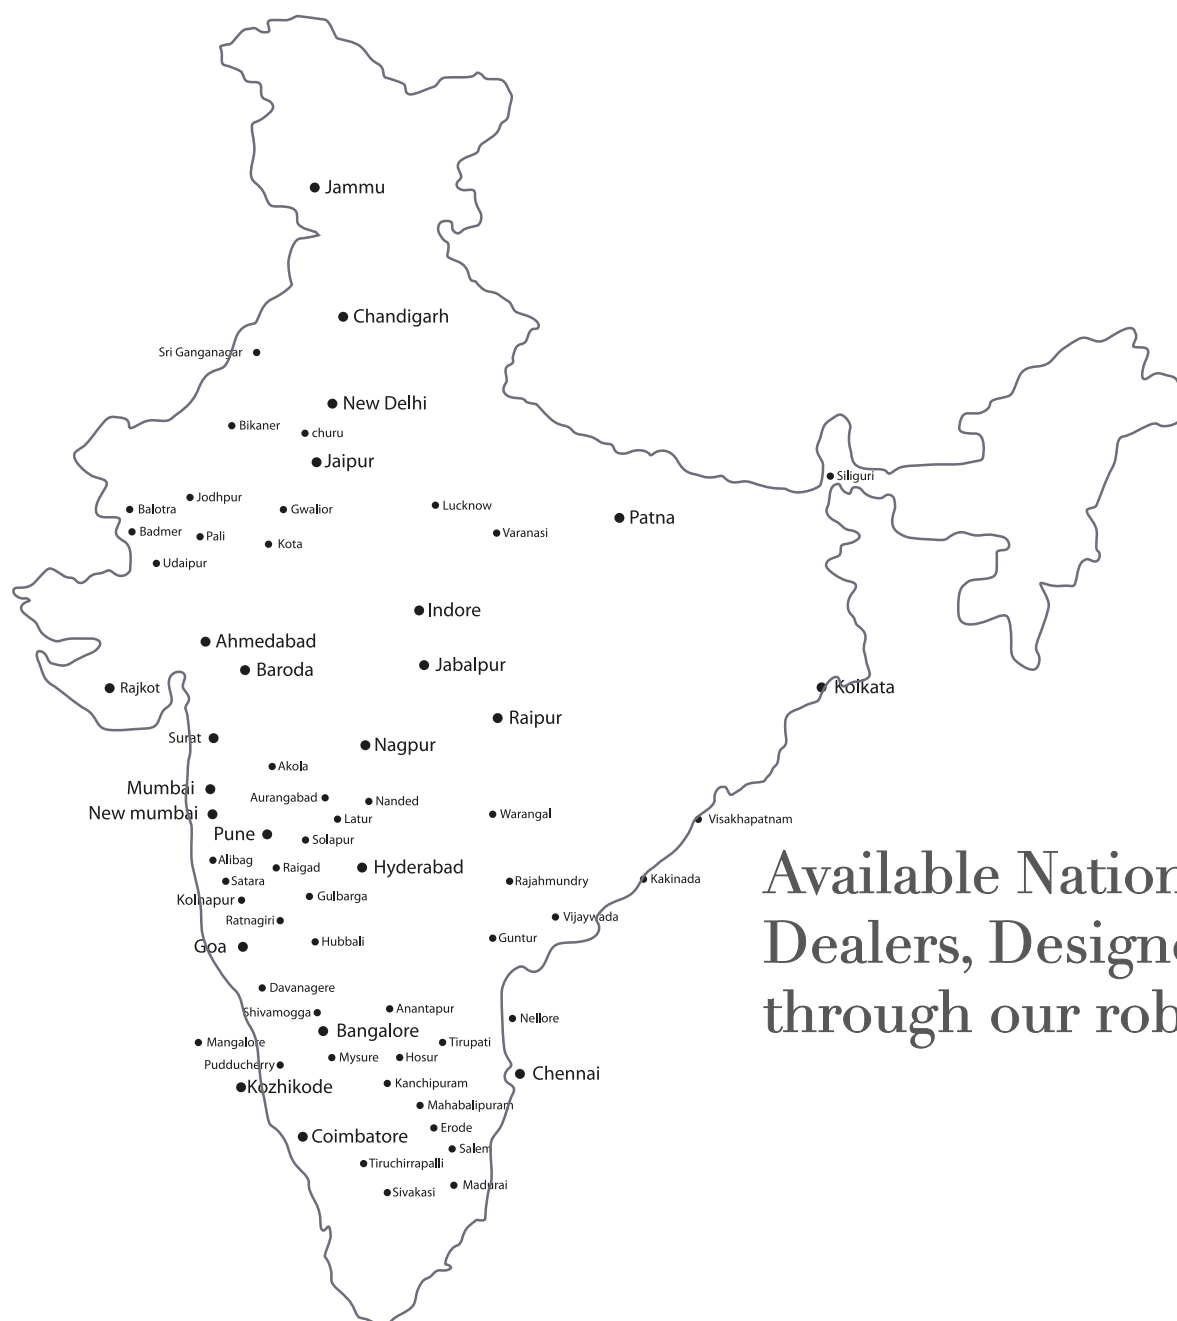

### Design

Our passionate efforts through huge experience in style, technology, comfort & affordability. Dexarte® designs are nature inspired created with skilful craftsmanship offering a dazzling spectrum of stunning colours, classy textures, scintillating crystal Gloss giving enormous beauty to your environment.

### High-satisfaction in service

We believe in satisfaction from the start to the end user. Our brand believes that a home is something very special & make sure this special moment of yours is enhanced with our products.

Available Nationwide. In India's leading  
Dealers, Designers & Architects Network,  
through our robust Distribution Partners.

DEXARTE CARES

APPLICATIONS

Kitchen Shutters | Wardrobes | Tables | Doors | shelves | Cabinets | Trolleys | Bathroom | Furniture  
Wall Lining and Vertical Surfaces | Office Spaces | Wall Cladding & Partition | TV Units

GENERAL INSTRUCTIONS

- DEXARTE acrylic sheets are designed for interior, vertical application, however horizontal application can be done at low traffic areas.
- Cleaning should be done with water and water based mild cleaning agents and wiped with a soft, non-abrasive microfiber fabric.
- Avoid the use of abrasive liquid cleansers, bleaching compounds or solution.
- Do not use thinner and alcohol based solvents on the surface of the acrylic laminates for cleaning.
- Do not place hot cookware directly on the surface of the laminate.
- Although the polymer is resistant to heat upto 30°C, prolonged exposure to temperatures above 30°C may cause damage below the surface thus resulting in an unpleasant stain or patch.
- Avoid use in areas exposed to intense direct sunlight such as large unshaded windows.
- In case of big size panels, due to thermal expansion of the material bubble formation is possible. 1mm gap of is advisable to compensate the thermal expansion of the material due to rise in room temperatures.
- PE protective masking must be removed within 7-10 days after the application.

APPLICATION INSTRUCTIONS

- Make sure that the surface of the substrate (plywood/mdf/hdf/particle board etc) is clean and dust free as well as oil free.
- Apply DEXABOND adhesive evenly on both the substrate and the back of the DEXARTE laminate.
- Before pressing the sheet on the substrate give some drying time for the adhesive. It ranges from 10 to 15 minutes depending upon the climatic conditions. Drier the weather lesser is the drying time.
- Once pressing is done any possible air pockets need to be removed using soft rollers and moving from the centre towards the edges. This will remove any air bubble between the laminate and the substrate.
- Apply uniform weight on the laminated board for 12-18 hours.
- The most common technical problems faced in the application of acrylic laminates are Bubble Formation and decoloring / Yellow patches on Surface. Thankfully these problems can be avoided in DEXARTE acrylic laminates by taking care of few small things as mentioned :

BUBBLES FORMATION

| Causes                                                                     | Solution                                                                                                                 |
|----------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------|
| Wrong selections of adhesive                                               | Use only DEXABOND ADHESIVE                                                                                               |
| Moisture content on Substrate/ Atmospheric Humidity                        | Use best quality Calibrated Substrate and make sure it is free of any moisture                                           |
| Due to thermal Expansion bubbles can form after few weeks of installation. | This can be avoided by keeping 1mm expansion gaps between two big size panels.                                           |
| Lack of Bonding /Curing time                                               | Laminated board has to be subjected under even load for at least 12-18 hours after pressing                              |
| YELLOW PATCHES / FADING                                                    |                                                                                                                          |
| Causes                                                                     | Solution                                                                                                                 |
| Exposure to direct sunlight                                                | Avoid application in areas with intense direct sunlight                                                                  |
| Reaction of adhesive with chemicals on substrate surface                   | Use best quality calibrated substrate with no chemicals on surface/Clean the surface thoroughly before applying adhesive |
| Use of adhesive other than olyethylene Vinyl Acetate Co-Polymer            | Use only DEXABOND ADHESIVE                                                                                               |

6H Anti-Scratch

Treated with a special lacquer coating on the surface, our 6h Anti Scratch Acrylic Laminates can bear daily wear & tear.

Termite & Borer free

Our Laminates are specially treated to ensure they remain termite and borer free for several years.

Durability & Strenght

Our Anti Scratch Acrylic Laminates are extremely sturdy and durable. They can withstand heavy loads easily.

Light Weight

For ease of use and effortless installation, our range of laminates have been developed in a way to keep them extremely light weight.

Anti-Virus Properties

Anti-bacterial and Anti-fungal

Anti-Yellowing

Whether it is in the kitchen, bathroom or the living room  
ESSENCZAA is widely used in furniture designs nowadays.  
ESSENCZAA lends pieces of furniture an air of elegance and quality.
